

The National Aeronautic Association and the Air Care Alliance

Present the

Going Above and Beyond

The National Aeronautic Association (NAA) and the Air Care Alliance (ACA) created these national awards in order to recognize the significant contributions to the Nation of volunteer-based Public Benefit Flying and the outstanding work of the individuals and organizations engaged in this humanitarian activity.

2003 Awardees

Distinguished Volunteer Pilot

David Altman

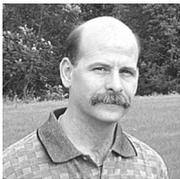

Based in Philadelphia, David had flown more than 220 missions for Angel Flight East by 2003. When there was a last minute request he was the first person called. If his plane was

in for maintenance he recruited someone else to help; by the time of his award he had helped recruit 23 new pilots. “No words can express what that man has done for our family,” said a mother whose daughter David flew for treatments over a period of two years. David was 81 years old when he received his award.

Distinguished Volunteer

Kevin Sell

Kevin helped found the Volunteer Pilots Association and has been “on call” 24/7 for most of the 13 years prior to receiving his award. Never without his cell phone and dog-eared

pilots list, Kevin accepts calls any time of day or night to rush a life-saving organ to a waiting transplant recipient. He personally coordinates about 225 missions per year and manages to do all this from his home in Pittsburgh with no paid staff on an annual budget of less than \$6000.

Outstanding Achievement in Advancement of Public Benefit Flying

Mercy Med+Flight

As the nation’s first successful free air ambulance operation Mercy Med+Flight had transported 309 patients in 42 states by 2003. Patients are flown by two qualified Citation jet

pilots and attended by two qualified medical personnel, one of whom is a registered nurse. Ground support is provided by a volunteer Director of Operations and volunteer Director of Maintenance. Based in Fort Worth, Texas, MMF provides an otherwise very expensive service, made possible only because of its volunteers who donate their professional skills.

Outstanding Achievement in Advancement of Public Benefit Flying

Tom Goodwin

Tom began public benefit flying’s most commonly recognized role of providing free medical transportation for the needy in 1978. Air-LifeLine, his Sacramento based organization,

grew to become the largest such group in the nation — flying more than 30,000 missions. His work inspired many other groups to provide medical transportation for those who could not otherwise afford it. Tom mended a gap in the nation’s healthcare net, and did it while quietly standing out of the limelight.

Teamwork Award

Angel Flight of Oklahoma, Volunteer Pilots Association, and all Pilots and Their Groups Flying Relief Missions Following the 9/11 Attacks

With commercial flights grounded the Oklahoma Blood Institute asked Angel Flight of Oklahoma to transport blood and test kits to New York City. Taking off on the night of Sep-

tember 11, AF OK's plane was met in Louisville, KY by planes from the Volunteer Pilots Association that took the blood to Philadelphia, then on to New York City, arriving at 6:30 AM on September 12. In the following hours and days a half dozen other volunteer groups flew 9/11 support missions — the only civilian aircraft permitted to fly in the Nation's airspace.

Champion of Public Benefit Flying

Civil Air Patrol

The Civil Air Patrol flies tens of thousands of hours each year on search, rescue, and disaster relief missions, and is credited with saving thousands of lives in its 61-year history.

CAP supports various federal agencies including Homeland Security, Coast Guard, Drug Enforcement Administration, Federal Emergency Management Agency, and the National Weather Service, as well as the Red Cross and Salvation Army. CAP members volunteer their time, talent, and resources to save lives and mitigate human suffering.

2004 Awardees

Distinguished Volunteer Pilot

Dr. Robert N. Cleaves

Following stints as a fighter pilot and missionary pilot, Robert founded and funded the Wilderness Conservancy and flew anti-poaching and medical missions to remote vil-

lages in southern Africa from 1986-96. In 2000 he began the Conservancy's Project Care, flying humanitarian missions to villages in Baja California, Mexico. There Robert furnished an ambulance and medical clinic, and provided two school buses, computers, and educational supplies to local schools to improve life in impoverished communities.

Distinguished Volunteer

Wanda Whitsitt

After learning to fly at age 50, Wanda pioneered volunteer flying in 1980 by founding Lifeline Pilots and serving as its Mission Coordinator for the first ten years. She had a tele-

phone ringing in her Peoria home day and night with requests for assistance and pilots calling to offer help. Wanda no longer flies but still serves on the group's Board of Directors. By 2004 the organization she founded had transported more than 2,500 persons to needed medical treatment when no other means was available to them. Her pioneering effort served as a blueprint for other volunteer pilot groups.

Outstanding Achievement in Advancement of Public Benefit Flying

J. Craig Honaman

Craig established the first hospital-based aeromedical program in a small city. Having flown medical evacuation helicopters in Vietnam, Craig developed formulas to project the number of missions required, their potential life-saving benefit, and the finances required to provide emergency medical transport in smaller cities. After establishing two hospital-based programs in Florida, Craig helped develop aeromedical standards at state and federal levels, expanding the use of aviation by hospitals and providing urgent care to more citizens.

Outstanding Achievement in Advancement of Public Benefit Flying

Wings of Hope

Since 1962 Wings of Hope has placed more than 140 aircraft in the United States and around the world to provide medical assistance to the poor. Volunteer pilots, mechanics, and nurses usually serve in remote and sometimes inhospitable areas. Missions include transporting sick and injured, distributing medical supplies, and bringing health care volunteers to those in need. In 2003 Wings started a free Medical Air Transport service based in St. Louis to serve needy non-ambulatory patients in the Midwest.

Teamwork Award

Angel Flight America Mission Coordinators

The Mission Coordinators for Angel Flight America created a national network to facilitate linking

humanitarian flights across the United States. Though Joint Operational Protocols they are able to link missions connecting six geographic regions of the U.S. Such coordination was critical in arranging humanitarian flights after hurricanes, tornadoes, and the attacks on 9/11. Most recently, the Coordinators were able to provide flights home for wounded soldiers and Marines on convalescent leave from Iraq.

Champion of Public Benefit Flying

America West Airlines

Through its Miles of Hope program the flying public can donate Flightfund miles to the Red Cross, Make-A-Wish Foundation, and Angel Flight America. Each charity is then able to provide airline transportation for its clients. Since its inception in 1998, more than 55 million miles have been donated to these organizations. Under this successful program, Angel Flight America has been able to provide airline tickets to 2,100 patients and family members who could not afford the cost of air travel.

2005 Awardees

Distinguished Volunteer Pilot

John William Boulton, Jr.

Bill has flown more than 150 flights comprising 2000 flight hours for the all-volunteer Angel Flight Inc. of Oklahoma. In addition to his generous contribution of an average cost of \$1,300 per flight, he has also purchased airline tickets for numerous stranded patients. Bill has been a spokesperson and recruiter for charity flying throughout Oklahoma and across the nation. He is an active Board member and volunteer pilot for Angel Flight of Oklahoma and the EAA Young Eagles program. Bill was 83 years old when presented with his award.

Distinguished Volunteer

Stephan Fopeano

A 16 year volunteer for Angel Flight West, Stephan is the driving force behind the Angel Flight Information Database System. The database allows several Angel Flight groups to increase the number of missions administered without adding staff and it is indispensable in streamlining operations. From Los Angeles, Stephan spends countless hours on the phone and email cheerfully assisting other regions without charge. He's always accessible, often working nights to resolve problems more quickly.

Outstanding Achievement in Advancement of Public Benefit Flying

LightHawk

Founded in 1979, LightHawk pioneered the use of public benefit flying for environmental protection. Its 140 volunteer pilots fly 500 missions a year for hundreds of environmental groups throughout North and Central America. LightHawk brings the unique perspective of flight to shed light on environmental issues. Its success inspired formation of like-minded regional groups such as Southwings in the Southeastern US, Northern Wings in the Northeast US, Ecoflight in Colorado, and Bateleurs in South Africa.

Outstanding Achievement in Advancement of Public Benefit Flying

Angel Flight West

Santa Monica based Angel Flight West has been an innovative leader since its inception in 1984. It expanded the traditional mission of medical care flights for patients to transporting victims of domestic violence, delivering holiday gifts to Navajo children, bringing special needs kids to camp, and reuniting wounded veterans with their families. It co-sponsored the first national public benefit flying conference, Air Med 90, originated the "wing organization" system in order to leverage local interest among pilots, and developed the database program now used by most Angel Flight America affiliated groups.

Teamwork Award

Mission Coordinators from Angel Flight East, Angel Flight of Georgia, Angel Flight of Oklahoma, CairFlight, LifeLine pilots and the Volunteer Pilots Association

Mission Coordinators from six independent public benefit flying groups have developed a

close working relationship that extends their reach to 37 contiguous states and the District of Columbia; a region that includes many world renowned medical centers. The Coordinators have become family, and there is nothing they wouldn't do for each other. They are united by their common purpose to help those in financial and medical need get the care they require and deserve.

Champion of Public Benefit Flying

Alaska Airlines

Alaska Airlines provides financial support to non-profit organizations assisting people in need in the communities it serves. For the past twenty years Alaska Airlines has given free air travel vouchers to Angel Flight West for patients who require air transport to obtain medical treatment but cannot afford the cost. Thus far, Alaska Airlines' contributions to Angel Flight West have totaled approximately 3.5 million dollars.

2006 Awardees

Distinguished Volunteer Pilot

Ted Ruscitti

Ted's first mission was bringing booties to dogs searching the World Trade Center after the 9/11 attacks. When Hurricane Katrina hit, he flew missions for two weeks

straight, flying in medical personnel and supplies, that he personally obtained, and flying out evacuees. He spent most nights sleeping in his plane. Ted lives in Pennsylvania, and is a volunteer pilot for many charitable groups. He shares his flight schedule with various Air Care Alliance listed groups in order to fully utilize available seats in his Cheyenne.

Distinguished Volunteer

Jubel Caldwell

Jubel is volunteer Director of Maintenance for Fort Worth based Mercy Med+Flight. For five years he did all the maintenance on its Cessna 421, which included three engine

changes. When MMF chose to upgrade to a Citation jet he located the aircraft, completed the annual inspection, and corrected all discrepancies. For any maintenance he can't perform, he schedules outside assistance but keeps a watchful eye. He's "on call" for every flight. After 2,300 accident-free hours on two aircraft, Jubel's bill remains the same – no charge.

Outstanding Achievement in Advancement of Public Benefit Flying

All Volunteers and Organization Flying Relief Missions following Hurricanes Katrina and Rita

Within days of Hurricane Katrina hundreds of volunteers working both inde-

pendently and through organized groups, created a relief effort on par with that established by large relief organizations and government agencies. In the midst of disorder and confusion, these volunteers improvised by establishing contact with local churches and other groups – often from smaller, isolated communities that had been bypassed. It is estimated that some three thousand volunteer missions were flown, bringing in rescue personnel and supplies and flying out evacuees, exhausted workers, and stranded animals.

Teamwork Award

Remote Area Medical Volunteer Corps and Wings of Hope

These two groups' first partnership effort was the operation of a field medical clinic in the Caribbean in 1995. The clinic used small bush planes to transport medical teams and sup-

plies and to evacuate patients requiring additional treatment. Since then, jointly sponsored clinics have been held in Haiti, Dominican Republic, Guatemala, Honduras, Belize, and the Appalachian region of the United States. The partnership has provided medical care to more than 5000 of the poorest of the poor.

Teamwork Award

Thomas H. Holcom

Tom is from Missouri and dreamed of a national network of public benefit flying groups that could link missions crossing geographic regions. The result of his vision was the incorporation of Angel Flight America in 2000.

Tom and other leaders soon began discussions with AirLifeLine to explore ways they could work together. In 2003 both groups officially merged. The expanded AFA reports a roster of 7000 volunteer pilots and 20,000 flights per year.

Champion of Public Benefit Flying

Continental Airlines

Since 1994 Continental Airlines has quietly and generously supported LightHawk's environmental protection work in Central America by providing free airline tickets for their vol-

unteer pilots and staff working in Mexico, Belize, Costa Rica, Honduras, Guatemala, Nicaragua, and Panama. Continental's commitment has never wavered – even during the severe economic downturns the airline industry suffered during this period. And the airline has never sought to publicize its generosity and support for protecting Central America's threatened natural environments. This award acknowledges their significant contribution to charitable aviation's good work of flying to help others.

Champion of Public Benefit Flying

The Nation's Air Traffic Controllers

Whenever a flight uses a call sign such as Compassion, Lifeguard, Angel Flight, CAP, or Young Eagles, each air traffic controller makes an effort to provide appropriate handling. This

can mean moving a patient's flight ahead of 30 airliners waiting for takeoff in Atlanta; being "cleared direct" New York to Philadelphia, or vectored "straight in" to Boston when others are told: "expect delay." Public benefit pilots have experienced these and many other courtesies by ATC to help comfort their passengers and speed them on their way for medical care.

2007 Awardees

Distinguished Volunteer Pilot

Chuck Schroll

Logging more than 160 hours in his first 18 months as volunteer pilot for LightHawk, Chuck didn't ease into the role, he fully embraced it. He's now flying more than 200

hours a year protecting threatened habitat and endangered species throughout North and Central America. An Emergency Room physician in Tucson, Chuck also flies medical missions each month to Baja California, Mexico, with the Flying Samaritans. Passengers regularly comment on Chuck's enthusiasm, unfailing good nature despite adverse conditions, and exemplary back-country flying skills.

Distinguished Volunteer

Guy Loughridge

As a member of Civil Air Patrol's Colorado Wing Guy has assisted in more than two hundred search-and-rescue missions and helped save 24 lives nationwide. He's also credited

with 72 "radar finds" that directed rescuers to precise search areas. Using software he designed and his home computer, Guy sifts through millions of radar blips to find and report likely crash sites. He commits 75 to 90 days per year to this work, a record of volunteer service unsurpassed at CAP.

Outstanding Achievement in Advancement of Public Benefit Flying

Peter J. Vanden Bosch

Once comfortably retired in Florida with a house, RV, and boat, Peter felt unfulfilled. At 68 he returned to Michigan and started Wings of Mercy. He worked 80 hour weeks as patient

screeener, manager, and pilot. Fifteen years later his organization has more than 300 pilots serving the poor in the Midwest. He has personally flown 227 missions. When patients ask him what they owe, he says "a hug." Now 84, he never considers retiring because "the rewards are awesome."

Outstanding Achievement in Advancement of Public Benefit Flying

Terrence Trapnell

Terrence is a bush pilot for Remote Area Medical Volunteer Corps serving indigenous poor in interior Brazil. Between missions flying doctors and dentists in and out of 30 wilderness airstrips, Terrence took a quick course in optometry and has now fitted more than 800 patients with glasses. Noting a high incidence of cervical cancer among the people he was helping, he became the onsite OB/GYN coordinator. Terrence's quiet dependability and willingness to assume diverse duties has earned him the acceptance and respect of the people he's serving and the admiration of the public benefit flying community.

Teamwork Award

Wings of Hope and

Fundacion AeroAmazonica

Each of these organizations is dedicated to improving the quality of life of the extreme poor.

Working together they fund scholarships for students who agree to serve the poor for two years. They make micro business loans to women heads of household, establish chicken and pig farms to provide a sustainable protein supply, air lift excess goods to nearby markets, and provide air ambulance service to 200 western Amazon villages in Ecuador.

2008 Awardees

Distinguished Volunteer Pilot

Bruce Bromberg

A resident of Jupiter Florida, Bruce joined Angel Flight Southeast in 2004 and has volunteered and flown over 100 missions each year. He increases his efficiency by combining missions and eliminating deadheading. He remains dedicated to the individuals he flies and will rearrange his schedule in order to fly them again. In addition to piloting, Bruce's contributions to governance has enabled the organization to grow in number of missions flown, outreach efforts and number of volunteers.

Distinguished Volunteer

Larry Gabriel

A pilot since 1957, it was natural for Larry to help form a group to provide free air transportation to people in need. Thus was born Illinois based Lifeline Pilots in 1980, and Larry has been a guiding light for the past 27 years. He has stuck through thick and thin, serving several terms on the Board as vice president and chairman of the finance, public relations and nominating committees. Larry never says "no."

Outstanding Achievement in Advancement of Public Benefit Flying

Lt. Col. Cynthia Ryan

Cynthia served as an international media spokesperson during the search for famed aviator Steve Fossett. She helped get worldwide recognition for CAP and public benefit flying in general by conducting timely and factual briefings that demonstrated the

impact volunteer organizations had on the search. The hundreds of interviews she conducted generated more than seven thousand national and international print and broadcast media stories. Nearly a year later, Cynthia continues to respond to ongoing media inquiries.

Teamwork Award

GivingFlite, Alabama Air National Guard and Volunteers Supporting Dreams on Wings

Dreams on Wings is a day of joyous adventure for children who face more hardship than most will ever know. For one day, they and their families come to Birmingham, AL to forget their hardships and focus on fun. Having completed its sixth year, this annual event is made possible by the continuing collaboration of the 117th Air Refueling Wing of the Alabama National Guard, GivingFlite and dozens of dedicated pilots and event volunteers.

Champion of Public Benefit Flying

The Aircraft Owners and Pilot Association

AOPA has a long history of honoring volunteer pilots and charitable flying organizations. From the President's office to the mailroom, AOPA contributes time, effort and personnel in support of public benefit flying. From convening the first Public Benefit Flying conference at AOPA headquarters in 1990, to subsequent articles in Pilot magazine and Air Safety Foundation, to providing program and booth space at EXPOs, AOPA is a champion of public benefit flying in the United States.

2009 Awardees

Distinguished Volunteer Pilot

Mack Secord

Mack Secord is one of 15 original pilots for Angel Flight of Georgia – an organization of volunteer pilots who donate their time and resources to fly people

to medical care, often-times for lifesaving treatment that they can only reach through free transportation. A former U.S. Air Force pilot who made a daring rescue of 2,000 hostages in the Belgian Congo, Mack received the Mackay Trophy for his heroism. For the past 23 years, he has served as a volunteer pilot for Angel Flight, making hundreds on trips on their behalf. In fact, he was given the first ever Lifetime Achievement Award by Angel Flight and the award will be named in his honor.

Distinguished Volunteer

Robert J. Munley

Bob Munley's love of aviation goes beyond his mere passion for flying. In 1996, Bob became one of the founding volunteers of Wings of Mercy East Michigan, a volunteer pilot organization that flies needy medical patients

free of charge to medical centers within 600 miles of Eastern Michigan. Bob has never received compensation for using airplanes to help people – either as a volunteer pilot or as a Board member, treasurer and mission coordinator for Wings of Mercy East Michigan. Bob has flown over 100 missions, working 80-hour weeks and has been on the phone round the clock helping those in need. He is committed to safety and has mentored many volunteers. His volunteer efforts have benefited many people.

Outstanding Achievement in Advancement of Public Benefit Flying

Corporate Angel Network

Since 1981, the Corporate Angel Network (CAN) has been arranging free air transportation for cancer patients traveling to receive critical treatments. Built upon the dreams of three people whose lives had been devastated by cancer, CAN has arranged over 30,000 lifesaving flights, using empty seats aboard business aircraft making otherwise routine trips. Over 500 corporate participants contribute 3,000 flights annually. CAN's mission eases the physical discomfort, emotional stress, and financial burden of travel for cancer patients. The program offers an obvious and meaningful benefit to patients, along with the opportunity for companies with business aircraft to provide a valuable community service by merging regular business activities with social responsibility.

2010 Awardees

Outstanding Achievement in Advancement of Public Benefit Flying

Bahamas Habitat

Since 2006 Bahamas Habitat (BH) has primarily provided aviation support for sub-standard housing repair and disaster response in the Bahamas. BH responded just two days after the devastating earthquake struck Haiti. BH collaborated with other groups and coordinated hundreds of flights in support of relief efforts by utilizing more than 120 volunteer pilots to deliver over 150,000 pounds of critical supplies and nearly 300 passengers, transported to or from seven airports throughout Haiti. Bahamas Habitat's focus on the airlift was to supply the outlying cities and towns of Haiti so as to distribute supplies directly where many refugees were fleeing. Their motto of "God's Love Takes Flight" was proven.

Public Benefit Flying Teamwork Award

National Business Aviation Association, AERObridge and Bahamas Habitat on behalf of All Volunteers and Organizations Providing Relief After the Haiti Earthquake

Following the devastating earthquake in Haiti in January, 2010, these organizations and volunteers flew to the aid of the people of Haiti. During a time of great need they provided relief, rescue, and support for the victims and the emergency workers. Through the collaboration of these organizations and volunteers 675 flights with 3,400 passengers and 1,200,000 lbs of critical supplies were flown to those in need. The passengers included medical personnel, relief workers, newly adopted children, injured patients, and missionaries.

These individuals and groups exemplify the best qualities of those using general aviation aircraft in their jobs and their lives.

Distinguished Volunteer Pilot

Gene Schmidt

Gene gave generously of his resources in the wake of the devastating earthquake in Haiti. He provided his skill, airplane, contacts, financial support, and non-discriminating and

selfless generosity, promotional ability, and leadership.

Personally funding most of his missions he flew countless hours carrying relief supplies in addition to transporting medical teams and patients to and from Haiti. His initiative and willingness to accommodate critical needs safely and assuredly was a major service to many on every front of the relief effort. As a volunteer pilot he provided a vital element of the major contribution that Bahamas Habitat made to those in need in Haiti following the disaster. Gene showed his commitment to long-term support by collaborating in the planning and joined Bahamas Habitat's team of first response pilots.

Distinguished Volunteer

Captain Justin Ogden

Civil Air Patrol

Captain Ogden pioneered the development of a cell phone triangulation system that can pinpoint lost and stranded individuals through their cell phones, even including

locating the sites of air crashes and other mishaps. This technology has greatly enhanced search and rescue operations across the United States for civilian and military use. Captain Ogden is a go-to resource for the Air Force Rescue Coordination Center. This dedicated volunteer utilizes his own time and expense to creatively combine his interests in electronics, Civil Air Patrol, and community service to develop a location analysis program that keeps pace with current technology and helps protect all Americans.

National Public Benefit Flying Award Categories

Distinguished Volunteer Pilot — awarded to an individual or individuals for outstanding service as a pilot volunteer.

Distinguished Volunteer — awarded to an individual or individuals for outstanding service as a non-flying volunteer.

Outstanding Achievement in Advancement of Public Benefit Flying — for outstanding achievement by an individual, group, or organization that helped raise the standard of service of or contributed significantly to the advancement of Public Benefit Flying overall.

Public Benefit Flying Teamwork Award — for outstanding cooperation and coordination involving two or more unaffiliated Public Benefit Flying organizations in the accomplishment of a common mission, task, or objective.

Champion of Public Benefit Flying — awarded to an individual, organization, or company who, while not operationally directly involved in Public Benefit Flying, has provided extraordinary support for such efforts and thus advanced the cause of Public Benefit Flying.

The National Aeronautic Association is a non-profit, membership organization devoted to fostering opportunities to participate fully in aviation activities and to promoting public understanding of the importance of aviation and space flight to the United States.

The Air Care Alliance is a non-profit umbrella group supporting charitable and volunteer-based flying throughout the United States.

The National Public Benefit Flying Awards are presented annually at the United States Capitol Building in Washington D.C.

Additional information on the Public Benefit Flying Awards can be found online at either www.naa.aero or www.aircareall.org.
